1 N the present age of new inventions, it is important that the inventor should not be deprived and defrauded of the benefits of their inventions, by artful and design ing men, but on the contrary to enjoy and have the benefits own use, and not talk so long about ruing, for we are of those rights as secured to them by the laws of the coun-

The subscriber having lately seen an advertisement in the newspapers published at Montpellier signed by E. A. Webb & Co. stating in substance that they are determined to make and sell Lester Triden's improved patent cooking Stove, and offering to indemnify all those who will purchase stoves of them or their agents:

Now this is to notify the public that the stove in question chanics who are best qualified to judge. The curved plate referred to in said Webb & Co's, advertisement in the Town stive is no long more nor less than a narrow plate running through the centre of the stave, over and annear which the firegasses to the flue, and was put into said Town stove more to do with the said Tilden stove than it would to put a circular curved plate in the centre of Conant's or any other stove; that the said Tilden's stove is entirely a new invention. Now we submit to the candor of the public, whether Messas. Webb & Co. are justified in the course they are pursuing in trying to deceive the public to induce the people to buy their stoves when they well know that every person who buys a stove of them are liable to be prosecuted and pay damages to us. We further state that the reason that the said Webb and Co. have taken this unwarrantable course is this: they tried to purchase a right of us to make and sell our stoves, but being unwilling to pay us what we thought we ought to have, they have chosen to take the course they have, thinking they might not be subjected to pay us so belier. we ought to have, they have chosen to take the course they have, thinking they might not be subjected to pay us so much damages as we asked them for the right of seling.

Now one word in answer to JL and G G Robinson and Darius S Rowell's advertisements in said papers. In the first place said Robinson sent on to the city of Washington last Fall a model of said Rowell's stove for the purpose as we supposed of getting it patented, but it seems for this very good reason it was found on trial not to be worth any thing. 2d. If the Rowell stove was an improvement they could not now by the laws relative to patents get a patentinglit, for the reason they have suffered at to be used by the public before obtaining a patent. Now there is one thing which would be satisfactory to every candid mind to show that we are right and that the said Webb and Co. and J L and G C Robinson and Darius S Rowell's advertisements are delicated with him in the concern, and once the firm of L. & W. Tilden & Co.

Comment is unnecessary.". In view of the foregoing, therefore, we caution the public against purchasing any stoves which the said Webb and Co. have denominated 'The Farmer's Cooking Stove,' being the same stove that the said Lester Tilden has a patent right for, as every person who purchases of said Webb and Co. or said J L and G C Robinson or their agents, or from any other person than our agents, is lighte to be sued and will be by us, as we are deturmined that said Webb and Co., nor no others, shall cheat us out of the benefit of said invention. POSTSCRIPT.

E have seen Messrs. Triden's facts for the people and pertifugging certificates, but they may be assured that they cannot induce the public to pay an extra price for sloves, as a premium for obtaining a patent on other men's inventions. They seem to think, if their lives are spared long enough, they shall sue sometody. Their theats are perfectly barmless, for they dare not sue and come to trial, for they know their patent would then be decided coid, and they would have nothing to bluster about. If they can be seen would have nothing to bluster about. If they can by any means be induced to bring a suit and come to trial, Mr. Holmes will then have an opportunity of telling his story, touler cath, and we have no fears for the result.

and purify the blood. The application of the principles of purgation being a lowed to be one of the greatest utility in the care and prevention of disease, it is of the greatest consequence to ascertain what medicine is capable of proroing the desired effect in the ca test, and at the same time most effectual manner.

It has no longer to contend with the b'ind prejudices of the greatest portion of the public; it is only with those few who are determined to be "killing according to rule," like the people of old, "who would have a king to rule over them." But thanks to the circulation of newspapars—thanks to the general diffusion of knowledge, which enables nineteen twenti-eths of the people to read and to judge for themselves -now we no longer believe in swallowing that dead ly mineral, mercury-professing to cure, but univer

It is now well understood that an inflammation is a wise ordinance of nature rignal that she requires the assistance of purgative medicine, to ease her of the oppressive burden which she proves by the high fever and the strong pulse, is wanted to be removed. In other words, the body

calls for a vegetable cleansing.

Brandrein's Vegetable Universal Pills require no skill in their administration; the printed directions only have to be observed, and they describe the just proportion of the dose, to the magnitude of the disease

Let all persons read the following opinion of a gentleman who knows the qualities of those Pills.

BRANDRETH'S PILLS. This medicine is acknowledged to be one of the most valuable ever discovered, as a purifyer of the b'ood and of fluids. It is superior to Sarsparilla, on, whether as a sodorific or alterative. It stands infiwhether as a sodorfice or alterative. It stanes infinitely before all the preparations and combinations of mercury. Its pargative properties are alone of incalculable value—for these poles may be taken daily for any period, and instead at weakening by the estimatic effect, they add strength by taking away the cause of weakness. There is no good mercury does which these pills do not likewise. But they have none of the miscrable effects of that deadly specific. The New York Sin says—Brandreth's Pills have been used among many-of our firends; and in our own family we have used them nerty four years when we required medicine; and in that period no Doctor save Dr. Brandreth has crossed our threshold, and no inedicines besides the Doctor's Pills used. Our ball it is, "keep your bowels and blood pure," and every kind of disease will be prevented and correct. The Brandreth Pills are eminently calculated to do this, and thereby much lessen the sum of human misery.

The New York Transcript says of Dr Brandreth's Pills—One of our carriers some time since gave notice that he was not able to attend to the duttee of his situation, in consequence of violent pains in his back and side. We recommended him not to despair, but to use these Pills. He did so, and they cured him perfectly. This is co pulf,—it is an actual fact.—We know the medicine a good. We speak from experience.

The Albany Argus says,—We consider the Brandreth Pills a medicine worthy the confidence of the public. JAYNE'S EXPECTORANT. From Atkinson's Philadelphia Eve. Post. Philadelphia, August 16th, 1838.

Mr Atkinson—Dear Sir: It has been my mislortune to labor under a cough and asthmatical oppresvery low by an affection of the lungs, and my complaint was declared incurable by a counsel of three physicians. I was then restored to as good health as I had enjoyed for many years, by using the Vegetable Pulmonary Balsam. Since my recovery I have recommend d the balsam in a great many lung complaints, and so far as I can learn, its use has invariably been followed by much benefit, and in many instances it has effected cures which were wholly unexpected.
